**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed." These data include bills on calendars and in conference at the end of the first session.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed." These data include bills on calendars and in conference at the end of the first session.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed." These data include bills on calendars and in conference at the end of the first session.

*These figures on measures reported included all placed on calendar or acted on by Senate even if there was no accompanying report. A total of 422 reports has been filed in the Senate; a total of 472 has been filed in the House.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed." These data include bills on calendars and in conference at the end of the first session.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed." These data include bills on calendars and in conference at the end of the first session.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed." These data include bills on calendars and in conference at the end of the first session.

DRUG INDUSTRY ANTITRUST ACT

Committee on the Judiciary: Committee met in executive session to consider certain amendments recommended by the President to S. 1552, proposed Drug Industry Antitrust Act (which bill is now pending on the Senate Calendar), after which it announced the following actions:

(1) The committee adopted an amendment to the bill which would change present law so as to prevent a new-drug application from automatically becoming effective, and requiring affirmative approval by the Secretary before the drug could go on the market.

(2) The committee adopted an amendment to give the Secretary an initial period of 180 days (or longer if agreed to by the applicant) for considering a new-drug application. Under the amendment, unless he decided to approve the new-drug application within that time, the Secretary would have to give the applicant 30 days to request a hearing and in the event of such a request would have 90 days, in addition to such 30 days, in which to schedule a hearing (unless a different time was agreed on). The committee further provided that appeal from the Secretary's action after hearing, refusing to permit a drug on the market or withdrawing it from the market, shall be subject to judicial review in the appropriate circuit court of appeals.

(3) The committee adopted a further amendment which would authorize the Secretary, if he found there was an imminent hazard to the public health, immediately to remove the drug from the market. In such cases he would have to give prompt notice of his action to the applicant and afford the applicant an opportunity for a hearing on an expedited basis.

These amendments, adopted by the committee today, will be proposed as committee amendments to the bill upon Senate consideration thereof.

Committee will meet again tomorrow for the further consideration of this matter.

DRUG INDUSTRY ANTITRUST ACT

Committee on the Judiciary: Committee continued its executive consideration of certain amendments recommended by the President to S. 1552, proposed Drug Industry Antitrust Act (which bill is now pending on the Senate Calendar), after which it announced the following additional actions:

> The committee today adopted an amendment in the nature of a substitute for section 9 of S. 1552 (relating to conspicuousness of official names of drugs) so that instead of merely requiring that the official name of a drug appear with such prominence and conspicuousness as is now required by the Food and Drug Act under other provisions of the act, the amendment will require that the so-called generic name of the drug—i.e., either the official name prescribed by the Secretary under section 10 of the bill or the official title of the drug in an official compendium, such as the U.S.P., or another generic name if there is no official name—appear on the label prominently and in type at least half as large as that used for the brand name of the drug.
>
> This was accomplished by substituting for section 9 of the bill the provisions of section 112 of the Harris bill, with one substantive change, i.e., to change from a rule of giving precedence to the so-called generic name in position and equal size type to a rule requiring at least half-size type and no precedence in position on the label.
>
> Under the substitute, the same rule as to the relationship between brand name and so-called generic name will apply to the total drug and to a brand name, if any, used for an ingredient.
>
> The committee decided to retain section 10 of S. 1552 relating to standardization of drug nomenclature instead of section 111 of the Harris bill because section 10 sets out in more detail the procedure of cooperation with the voluntary bodies that both the administration and the committee have in mind.

These amendments will be proposed as committee amendments to the bill upon Senate consideration thereof.

Committee will meet again tomorrow for the further consideration of this legislation.

TRADE EXPANSION

Committee on Finance: Committee continued its executive consideration of H.R. 11970, proposed Trade Expansion Act of 1962, after which it announced the following actions:

The committee agreed tentatively to amend section 102 of the bill, the Statement of Purposes, by requiring that the mutual benefits to be derived must be trade benefits.

Paragraphs Nos. 3 and 4 of the Statement of Purposes were deleted. These refer to assistance to underdeveloped countries and the prevention of Communist penetration. It was the opinion of the majority of the committee that the balance of the Statement of Purposes was sufficiently broad to permit the President to carry out the intent of the program.

Deleted section 231 of House-passed bill, substituting therefor related provision in existing law. This is the section relating to Communist-dominated areas and the change would permit a continuation of the present practice of granting most-favored-nation treatment to Yugoslavia and Poland. This section was further amended to include specific reference to Communist China as one area which may not receive most-favored-nation treatment.

Committee will continue consideration of this bill tomorrow.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed." These data include bills on calendars and in conference at the end of the first session.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed." *These figures on measures reported include all placed on calendar or acted on by Senate even if there was no accompanying report. In the Senate 1,116 reports were filed during the first session and 1,174 in the second session; while the House filed 1,283 in the first session and 1,288 in the second session.

**This figure does not agree with the total difference between bills reported and bills passed, because resolutions and bills placed on the House Calendar without having been formally reported were not included in figures of measures reported to the House; the difference in the case of Senate figures is due to uncounted bills "laid on the table" or "indefinitely postponed." Reported measures not acted on include measures reported during first session. These data include bills on calendar and in conference at the end of the first session.

***Subsequent to sine die adjournment 14 House special reports were filed and are included in above figure.

INDEX

This index is keyed to the DIGEST as published with the DAILY CONGRESSIONAL RECORD; the page references below are listed accordingly, as D5, D6, etc.

The bill numbers of proposed legislation are affixed to the subject references so that the subject matter of each measure will be readily available. The breakdown under each subject divides the action on the proposals according to: Communications from the President, hearings or actions by House or Senate committee or joint or conference committee, consideration or action by House or Senate Chamber on the measures, and the public law number when the bill or resolution has been enacted.

The use of an index so devised serves a twofold purpose: Gives all references to such legislation in the DIGEST as well as accounts for the status and history of each bill or resolution.
